Javier Cruz Araneda

Mathematical Engineering Student

Profile

I am a curious and reflective person when it comes to the topics I care about, such as probability, data handling and, especially, deep learning and neural networks. My enthusiasm for mathematics and computer science drives me to constantly explore new architectures and applications. I am looking for development opportunities where I can apply my knowledge to improve existing solutions or build innovative answers from scratch.

Education

Mathematical Engineering (Ingeniería Civil Matemática)

Universidad de Chile

2021 – present

High School Diploma

Instituto Nacional José Miguel Carrera

2017 – 2020

Professional Experience

Internship — Corporate Risk Division

Banco de Chile

January 2026 - February 2026

- Modeling and forecasting of credit portfolio migration using Markov chains.
- Automation of data extraction (CMF) and KRI computation through Python scripts, concluding with the presentation of the 2025 financial benchmark to the team.

Internship — Computational Biology Lab

Fundación Ciencia & Vida

January 2024

- Modeling and analysis of biological data from retinal ganglion cells.
- Manual filtering of samples from the database used.
- Collaborative development of an online repository documenting the procedure.

Specialization Courses

CC5205 Data Mining

CC6204 Deep Learning

MA5307 Numerical Analysis of Partial Differential Equations: Theory and Laboratory

MA5406 Probability and Statistics for Data Analysis

MDS7103 Databases

MDS7104 Machine Learning

MDS7201 Data Science Project

MDS7202 Scientific Programming Laboratory for Data Science

MDS7203 Deep Generative Models
